## Education

---

- **Atal Bihari Vajpayee Indian Institute of Information Technology and Management, Gwalior**  
M.S. in Artificial Intelligence & Data Science *Pursuing*
- **Jai Parkash University, Saran**  
B.Sc. Mathematics *March 2025*

## Skills Summary

---

- **Languages:** Python, SQL
- **Data Science:** NumPy, Pandas, Scikit-learn, TensorFlow, Keras
- **Deep Learning:** Artificial Neural Network (ANN), CNN
- **Data Visualization:** Matplotlib, Seaborn
- **Tools & Platforms:** Jupyter Notebook, Google Colab, VS Code, Git, GitHub
- **Other:** Exploratory Data Analysis(EDA), Feature Engineering, Model Evaluation

## Projects

---

### Sentiment Analysis on Amazon Kindle Reviews

- Performed sentiment analysis on Amazon Kindle Reviews dataset to classify customer reviews as positive or negative.
- Conducted extensive data cleaning, text preprocessing, and exploratory data analysis(EDA).
- Applied machine learning models using TF-IDF and Count Vectorizer features.
- Evaluated model performance using accuracy, precision, recall, and confusion matrix.

### Artificial Neural Network for Binary Classification

- Designed and trained an ANN model using TensorFlow and Keras.
- Implemented Adam optimizer and Binary Cross-Entropy loss.
- Evaluated model performance using accuracy and loss metrics.

### Comparative Machine Learning Models for Classification

- Built and compared multiple supervised learning models including Random Forests, Support Vector Machine (SVM), Gradient Boosting, and Logistic Regression.
- Performed feature scaling, train-test split, and hyperparameter tuning using GridSearchCV.
- Analyzed model performance using accuracy, F1-score, ROC-AUC, and cross-validation
- Identified the best-performing model based on balanced bias-variance tradeoff and interpretability.
